

INVENTING A SMART FUTURE

SIMCom Company Profile

Oct, 2024

SIMCom Overview

Why choose SIMCom?

20⁺ years

Leading the wireless module industry

180⁺ countries

Worldwide sales network

10,000⁺

Collaborate customers all over the world

500⁺ million

Cumulative shipments

No.1

Global shipment in 4 consecutive years

500⁺ million

Investment in 5G R&D and automatic equipment

5000⁺ m²

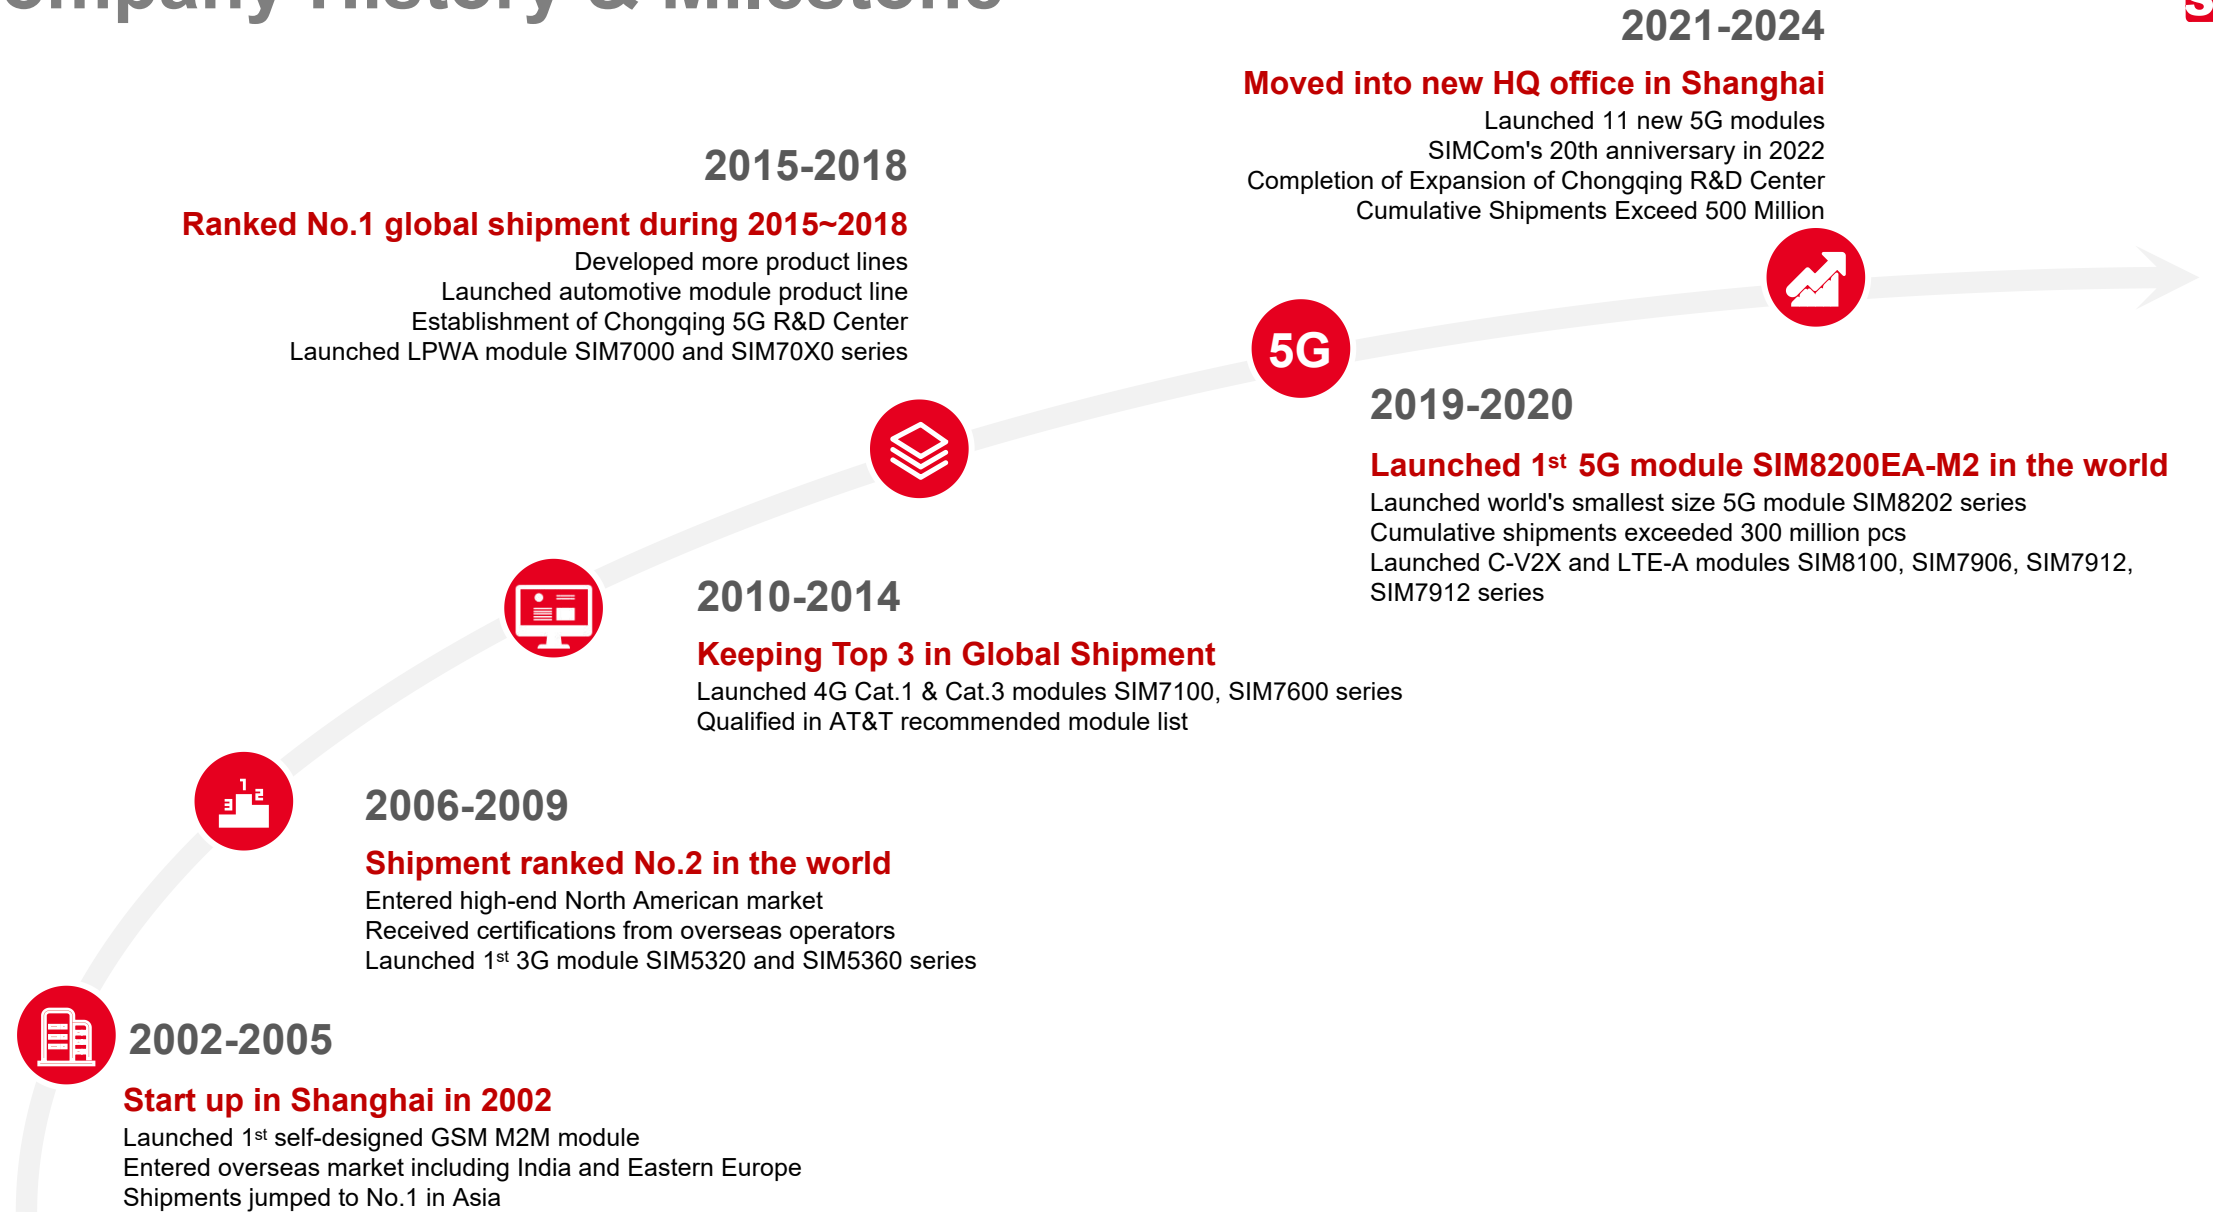

R&D laboratory

500⁺

Global patents and certifications

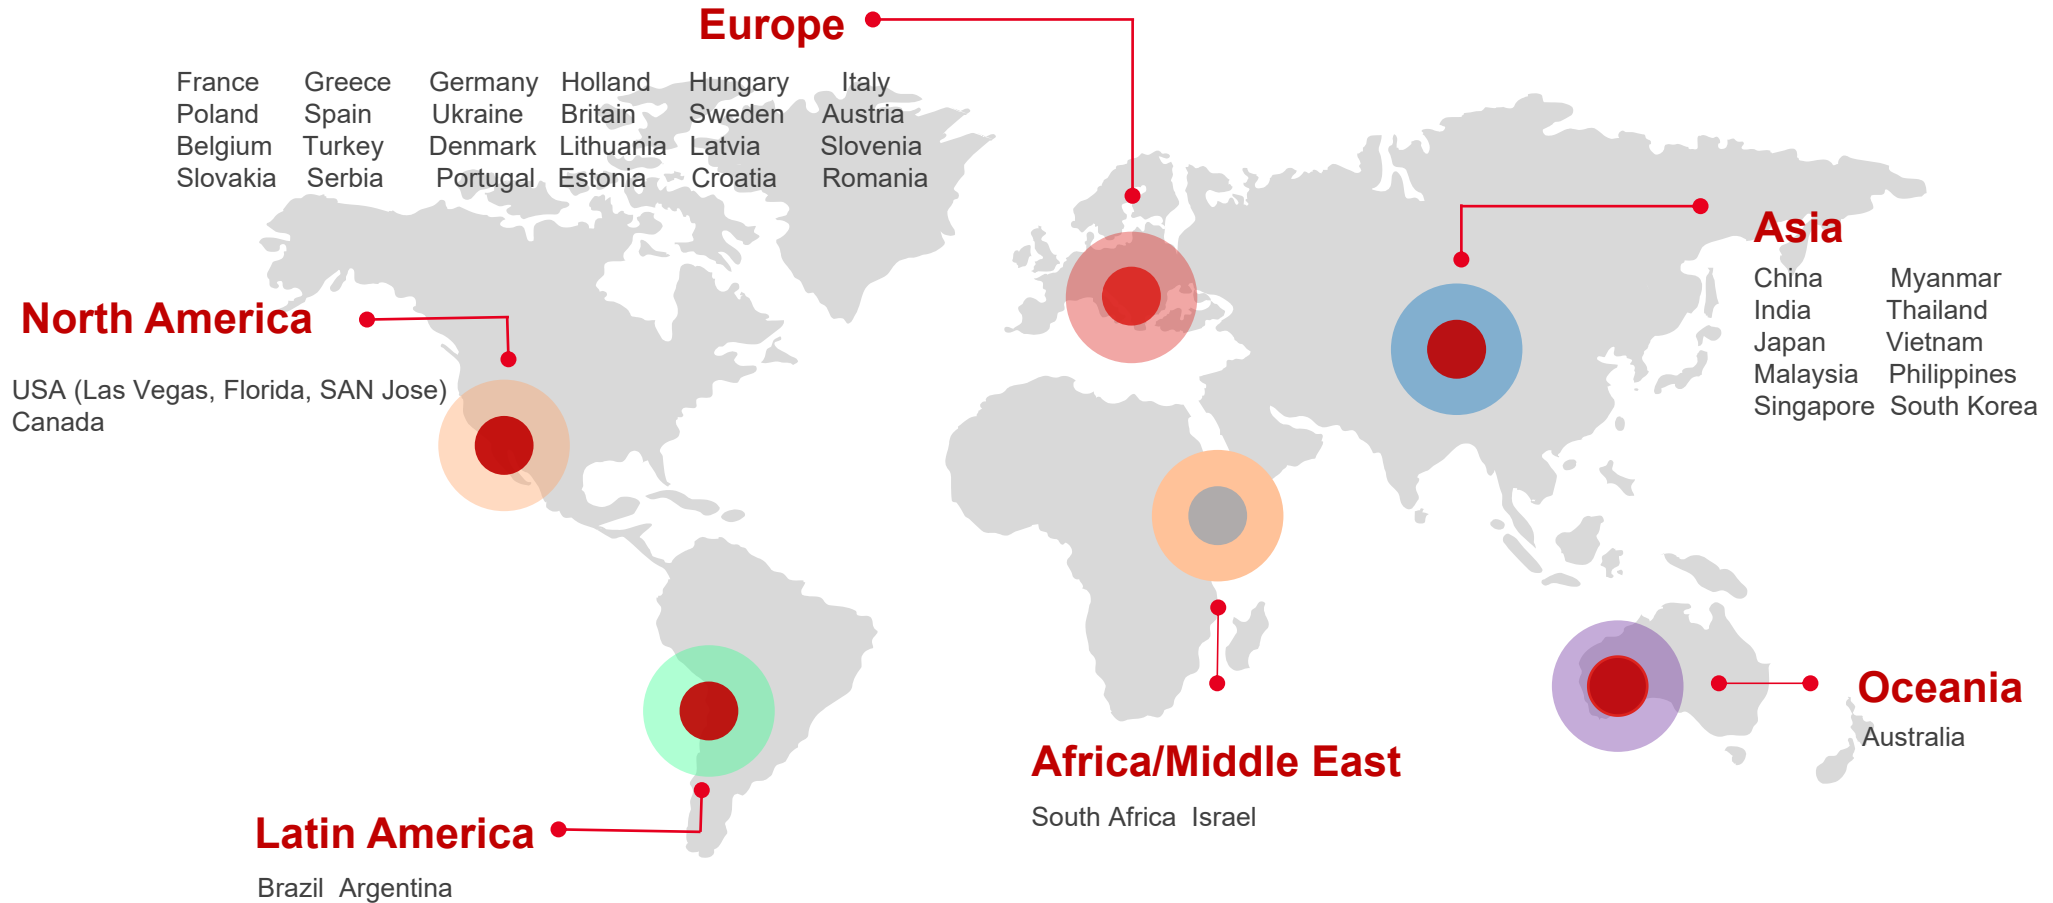

Company History & Milestone

Global Sales Network

Serve **180+** countries and regions in five continents.

Key Partners and Ecosystem

Helping customers to develop global markets.

Rich certifications save customer large amount of time and investment.

Main Component Vendors

Global Certifications

Global Carriers

Software Solutions

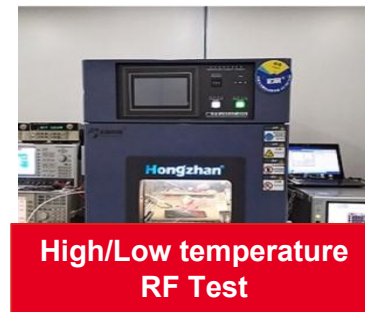

Cloud Platform&Services

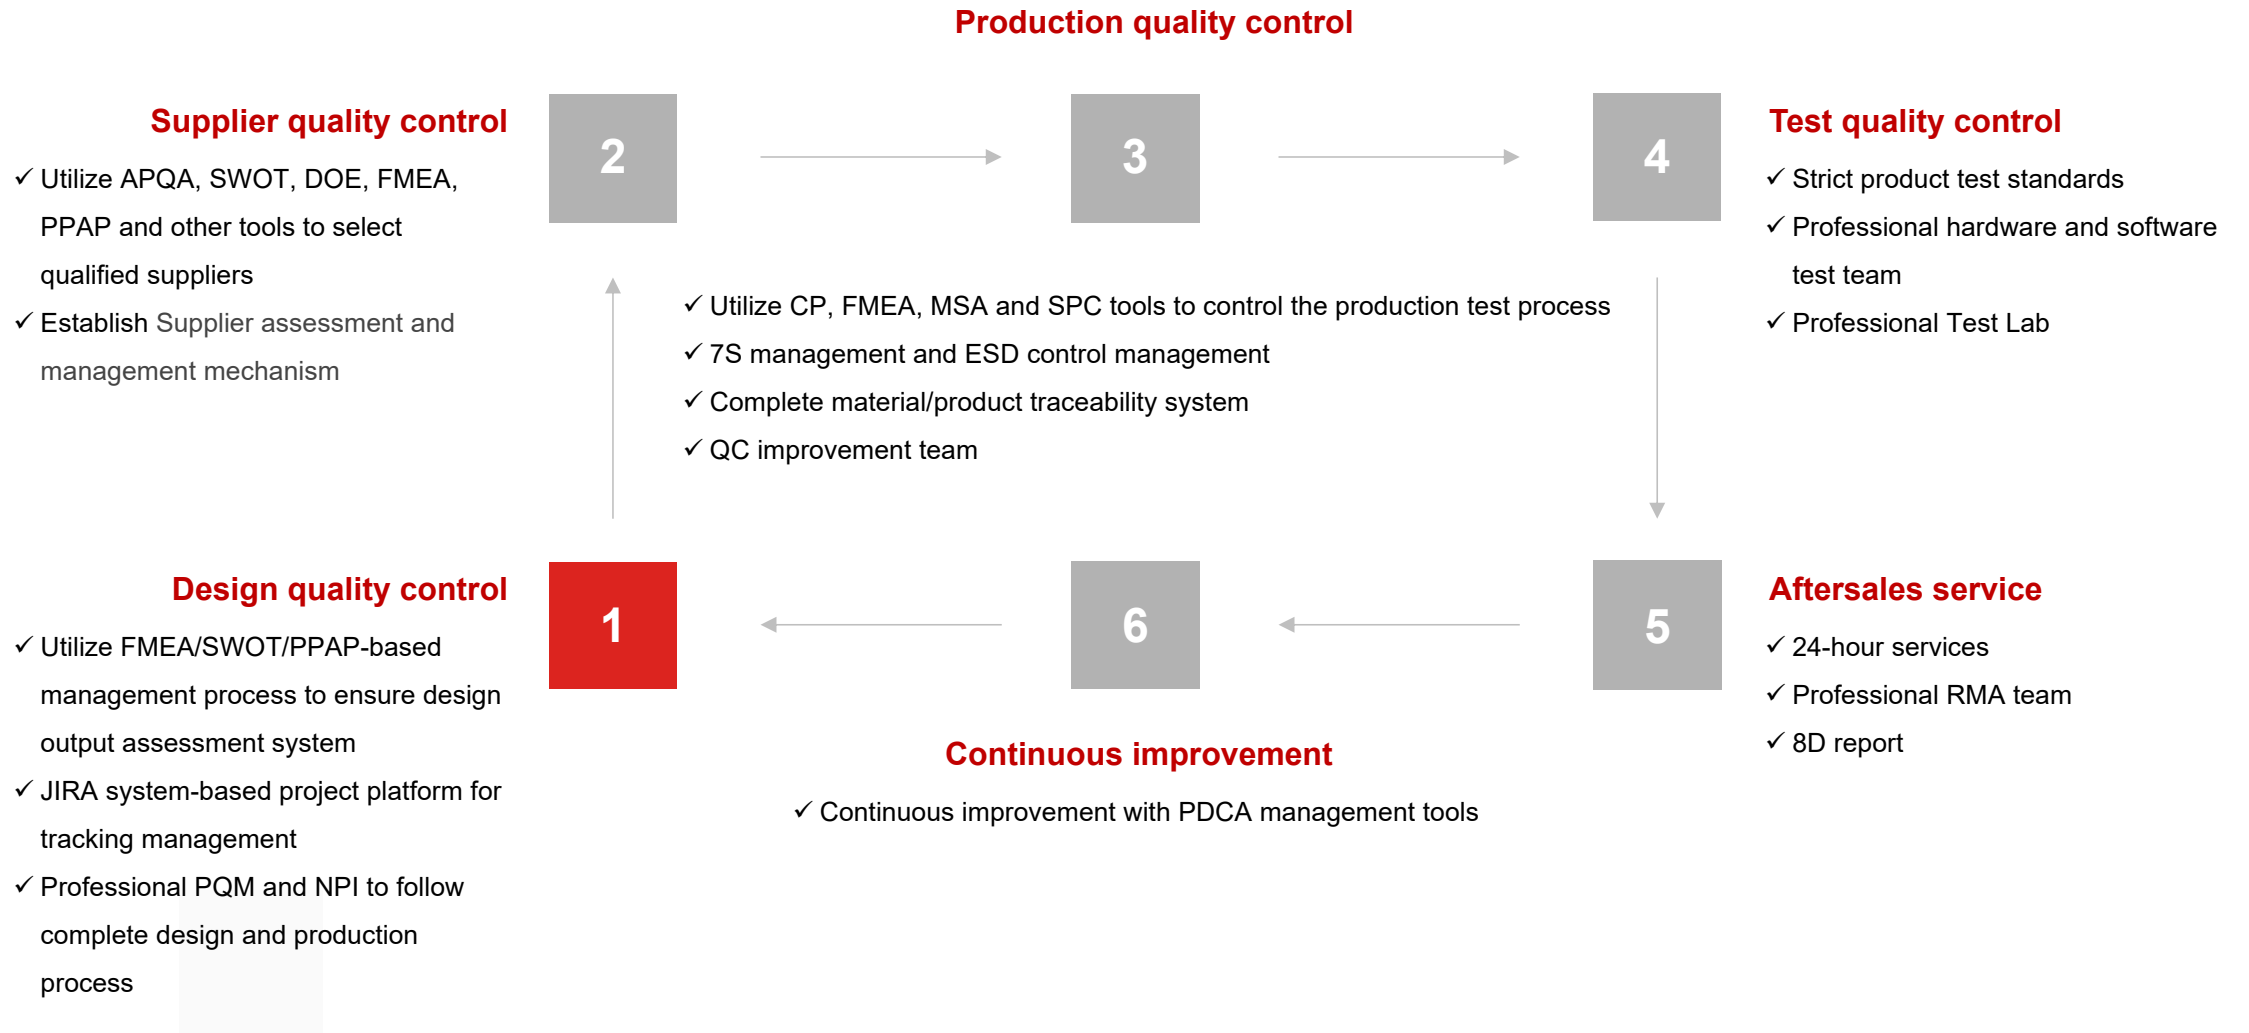

Top Level Labs Ensure R&D Quality

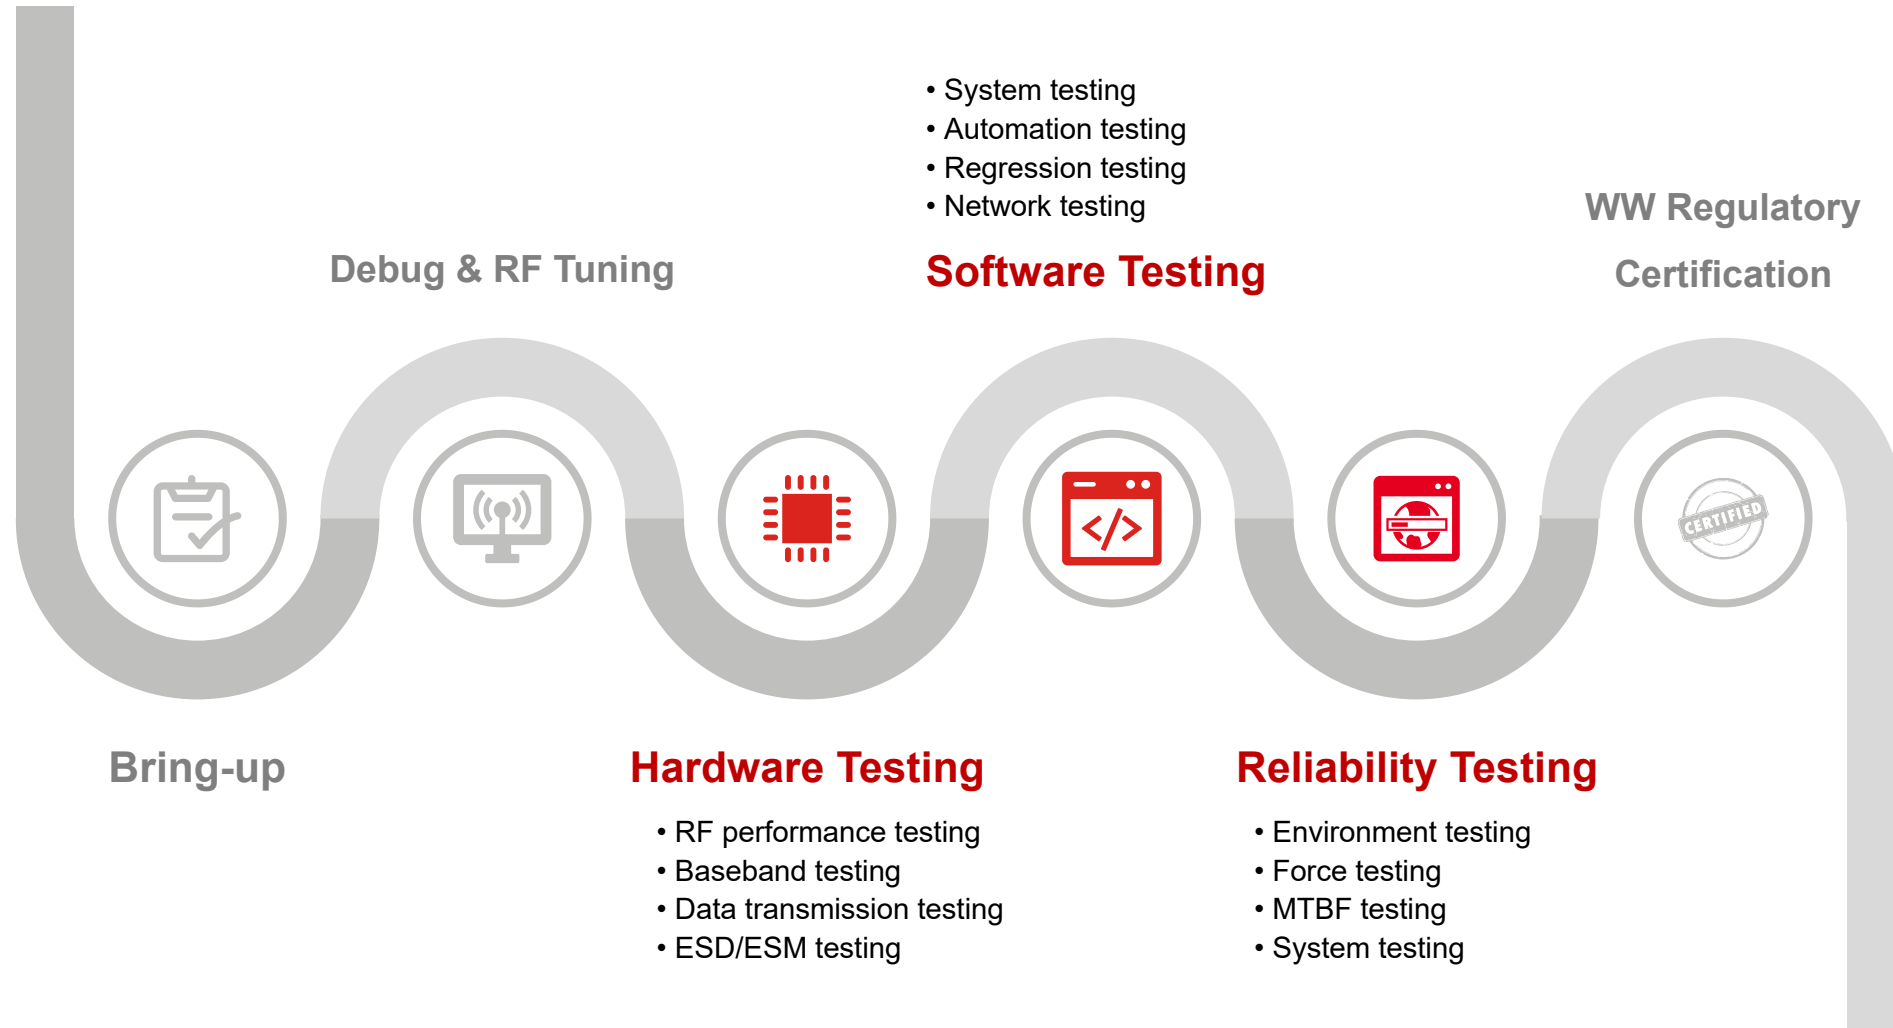

5,000+m² advanced labs equipped with world's leading instruments

Quality Control Management

R&D Quality Control

Supply Chain Management

Multiple qualified factories and automatic production lines

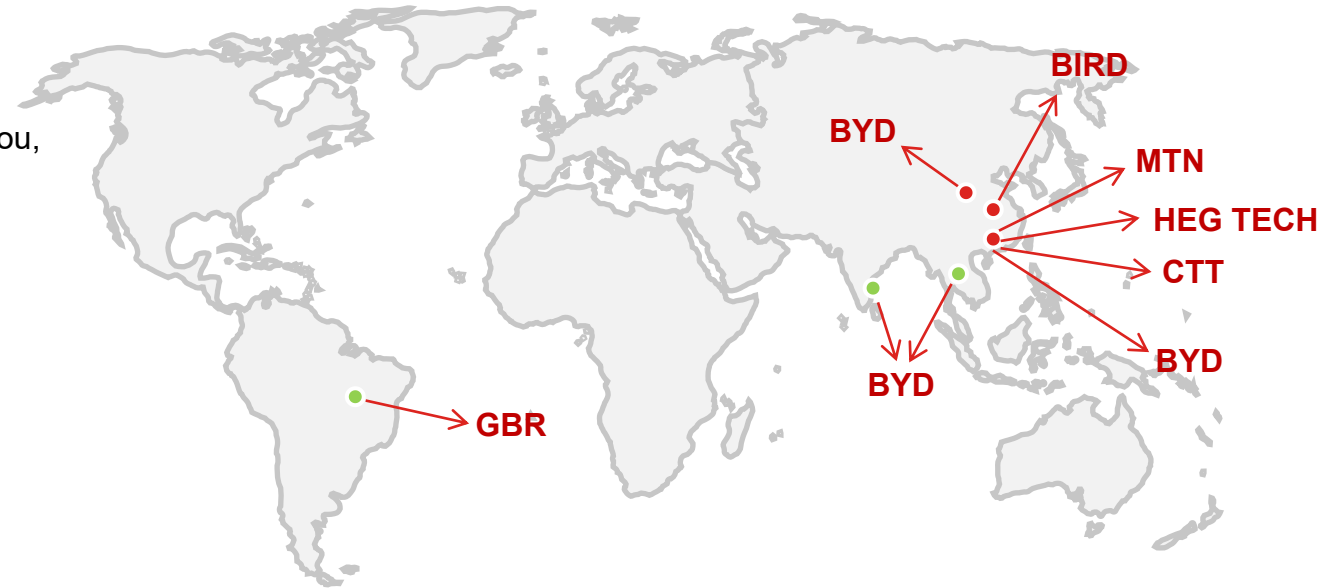

- Qualified factories includes BYD@Shenzhen, BYD@ Xi' an, BIRD@Suizhou, CTT@Huizhou, HEG TECH@Huizhou, MTN@Huizhou, BYD@ Vietnam, BYD@ India, GBR@Brazil
- Innovative Auto lines dramatically shrink back-end cycle times

Business Continuity Management process

- Monitor potential losses ,develop risk-mitigation process
- Continuous review of internal/external partners & suppliers

First-class quality

- Strict quality control system for high-quality products

Multiple manufacturing partners assure delivery and lead-time

Production Capacity

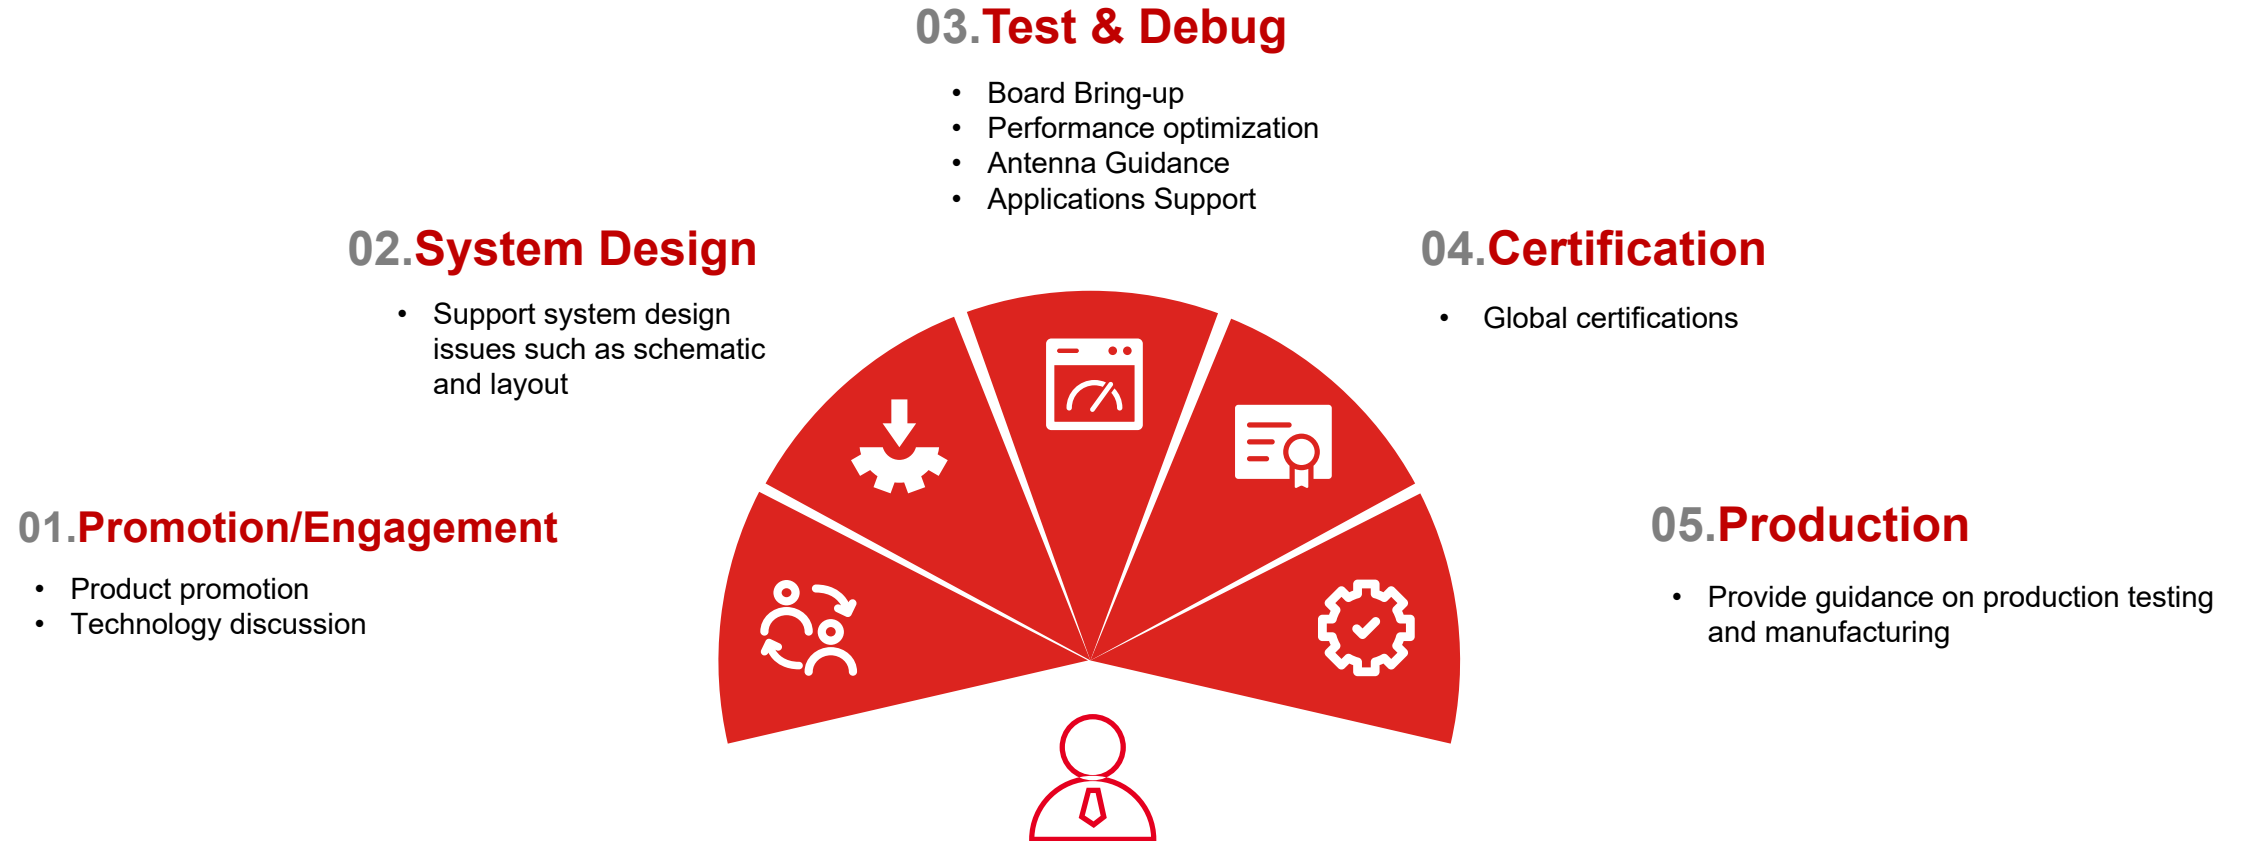

- Advanced SMT Machine
- Daily production capacity >200K pcs
- Standard leadtime: 8-12 weeks

Qualified Production System

- ISO9001
- ISO14001
- ISO27001
- ISO45001
- OHSAS18001
- IATF 16949 : 2016
- QC0800000
- TL9000
- ESD2020

SIMCom manufacturing strategy assures on-time delivery

All-round customer technical support

SIMCom is prestigious for its services which are incorporated throughout product life-cycle

Core Competitiveness

01 R&D

With 20 years of hardware development and RF technology accumulation, SIMCom has sustained its lead position in the industry

02 Product roadmap

Complete range of product lines providing multiple choices of network types and chipsets for customer.

03 Supply Capability

Stable cooperation with five reliable manufacturers who adopts automatic production lines.

04 Sales network

A worldwide sales network with 30+ sales offices covering 180+countries and regions

05 Services

Provide software and certification support based on a customer-oriented service system.

Product Portfolio

SIMCom Product Portfolios in the 5G Era

Positioning

- | Single Frequency & Multi-mode
- | Multi-Frequency
- | RTK

IoT Applications

Typical Applications

Industry

- Industrial PDAs/ Scanners
- Industrial PCs
- Rugged Tablet PCs
- Pipeline Monitors
- Robots
- Flowmeters
- UAVs
- Industrial Refrigerators
- Indoor Air Monitozzzrs
- Water Valves/ Pump Controls

Life & Healthcare

- Personal Trackers
- Pet Trackers
- Wearables
- Home Automation
- Elderly Monitoring
- Remote Medical Equipment
- Glucometers
- Blood Pressure Monitors
- Recreational Machines
- Patient Monitoring Laptops

Agriculture & Environment

- Trail Cameras
- Food Traceability
- Farmland Monitoring
- Farm Machinery Management
- Meteorological Stations
- Wildlife Tracking
- Irrigation
- Environmental Monitoring

Typical Applications

Telematics & Transport

- Automotive OEMs
- Vehicle Tracking
- Asset Tracking
- Ship Tracking
- Special Purpose Vehicles
- Fleet Management
- OBD
- Vehicle DVRs
- Usage-Based Insurance

Energy

- Electricity Meters
- Gas Meters
- Water Meters
- Heat Meters
- Smart Grid
- Wind Turbines
- Solar Panels
- Charging Piles
- OBD
- Vehicle DVRs
- Usage-Based Insurance

Payment

- Wireless POS
- Cash Registers
- ATMs
- Vending Machines
- Top-up Machines

Typical Applications

Safety

- Alarms
- Gas Detectors
- Intrusion Detection
- Motion Sensors
- Smoke Detectors
- Asset Protection

Smart Cities

- Street Lighting
- Smart Parking
- Advertisement Displays
- Traffic Lights
- Parking Meters
- Smart Bins
- Sharing Economy
- Toll Collection Systems
- Outdoor LED Lighting
- Smart Elevators
- Digital Signage

Gateways

- DTUs
- VOIP
- Consumer Routers
- Servers
- Industrial Routers
- Wi-Fi Hotspots

Typical Application Smart meters

SIMCom and Partners have created a series of smart metering devices in an effort to make sure that Water/gas/electricity is better distributed and protected.

These Smart metering applications were equipped with SIMCom's LPWA modules, used to realize remote data transmission and control. It supports accurate measurement, remote data transmission and real-time monitoring. More than that, it has certain warning functions, and helps the control platform to enable smart management, improve the management efficiency, and save human and time cost to a very large extent.

Typical Application

Smart Payment

Alipay Box Dragonfly F1 is a device terminal that combines Alipay Cloud's face recognition function and IoT technology. SIMCom smart modules have been used in this device for data transmission. Alipay Box Dragonfly F1 combines voice broadcast, password keypad, and advertising electronic poster, face recognition payment, scan code payment and other functions.

Compared with traditional payment methods, with the addition of biometrics and facial recognition, smart payment has enabled convenient self-service shopping, giving consumers a hands-free experience.

Typical Application Industry Router

Industry router is a fundamental device in the wireless communication. SIMCom 5G modules have been used in the 5G industry router, it can use public 4G/5G networks to provide users with long-range wireless big data transmission.

The 5G industrial router adopts high-performance industrial communication processors and industrial wireless modules and an embedded real-time OS is operating as its software support platform.

Typical Application

Fleet management

SIMCom LTE Cat.1 modules can provide proper transmission rates for data uploading and downloading, remote controlling, video surveillance, and voice calling. The capability of automatic fall-back to 2G/3G ensures the fleet continuous wireless connection on road. Moreover, the optimized RF design brings much more stability to the networking when the vehicles are running at high speed.

The GNSS positioning modules of SIMCom consist of the modules that support standard precision positioning working on a single frequency and dual frequency and the high-precision modules with capabilities such as RTK (Real Time Kinematics), and DR (Dead Reckoning).

Typical Application T-Box

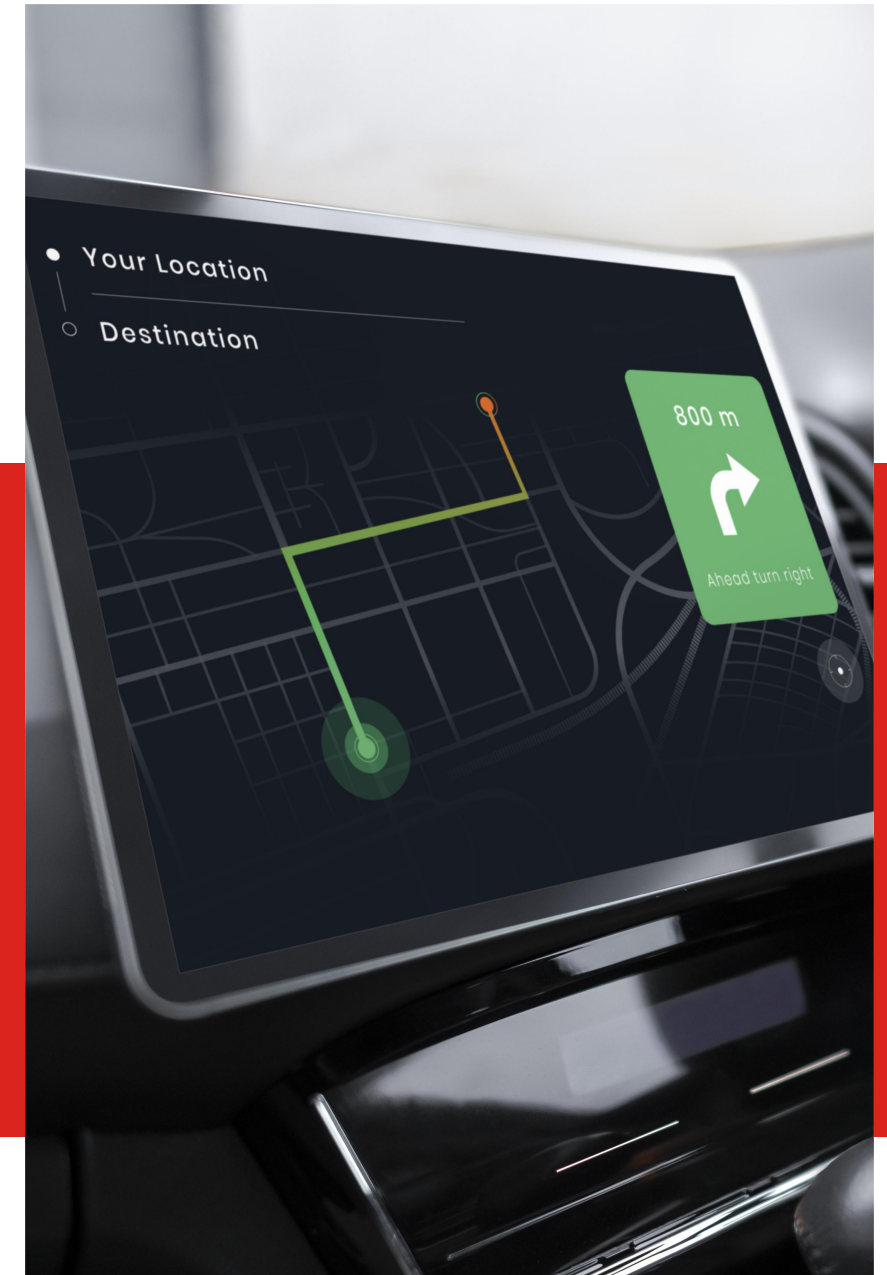

With increasing demands from car owners, the majority of new vehicles are equipped with networking capabilities. The penetration rate of vehicle interconnectivity will increase year by year. With complicated and harsh in-vehicle environment, this requires high standards on equipment and components, and core components need to meet automotive grade requirements. SIMCom's automotive modules can provide OEMs and tier-1s vendors with a more stable and reliable solution.

Typical Application In-Vehicle Infotainment(IVI)

With the prosperous development of the automotive industry and the transport industry, in-vehicle infotainment system is expected to become a highlight of future vehicles, providing the most useful traffic information and entertainment service anywhere anytime, including navigation, video and audio streaming, and network connectivity.

SIMCom has collaborated with its partners to develop highly integrated and cost-effective in-vehicle infotainment, with support for WiFi hotspots, Bluetooth, navigation, music streaming and other features.

INVENTING A SMART FUTURE

Thanks !
